Proceedings of the 2nd British-Nordic Conference on Library and Information Studies, Queen Margaret College, Edinburgh, 1997*. - London, Los Angeles: Taylor Graham, 1997.

* Review in INSPEL forthcoming

INSPEL is a professional journal primarily for the dissemination of papers written or proposed for publication by members of the IFLA Division of Special Libraries. The Division promotes and coordinates the work of particular relevance to the specific types of libraries or library activities in its Standing Committees for Art Libraries, Biological and Medical Sciences Libraries, Geography and Map Libraries, Government Libraries, Science and Technology Libraries and Social Science Libraries.

The Journal is directed to an international readership among librarians in government and international agencies, as well as in universities and research institutions. Librarianship is a key subject in a rapidly changing world. Improved practice will help produce economic benefits, and special attention should be given to problems concerning libraries in Developing Countries.

Articles will be drawn primarily from activities conducted within IFLA. But on occasion the Journal will publish articles on specified topics by non-IFLA contributors. Any reader interested in preparing such an article is invited to submit the paper to the Editor. Material on all aspects of librarianship will be considered eligible for publication.

The views and interpretations in articles published are those of the authors and do not necessarily represent the policies of IFLA or ASpB.

Comments or brief notes responding to Journal articles are welcome and will be considered for publication to the extent that space permits.

Instructions to authors

Manuscripts submitted must be in English or French. The quality of the language must meet the standards of the international scientific community. The paper should not exceed 20 typewritten pages (A4) double-spaced with wide margins. Whenever possible provide the text in electronic form additionally using any exchange standard like RTF or HTML or clearly stating the software used, the program version number, as well as the format of the diskette.

The title page of the manuscript should contain the following information: an informative and short title, the name(s) and institutional affiliation(s) of the author(s) and an English abstract of not more than 150 words intelligible in itself.

Provide illustrations in camera-ready form on separate sheets numbered consecutively and with descriptive legends on the back. Details, contrast and size must be adapted to the printing process. All figures and tables should clarify the text: keep theirs numbers to a minimum.

Please follow any good general style manual for references, footnotes and bibliography. The editor reserves the right to make slight changes in the wording of manuscripts in order to increase readability of the texts.
